# Importing Projects into Eclipse

Step 1: Open your IDE (Eclipse), and select **Import**.

Step 2: Expand the **General** folder and select **Existing Projects into Workspace**. Click **Next**

Step 3: Click the radio button for **Select archive file** and click **Browse** next to it and select the file you've just downloaded. Click **Open**.

You'll see the path in the window and the Project appear in the Projects box.

Step 4: Click **Finish**.
